witeg GERMANY - Home of Innovations

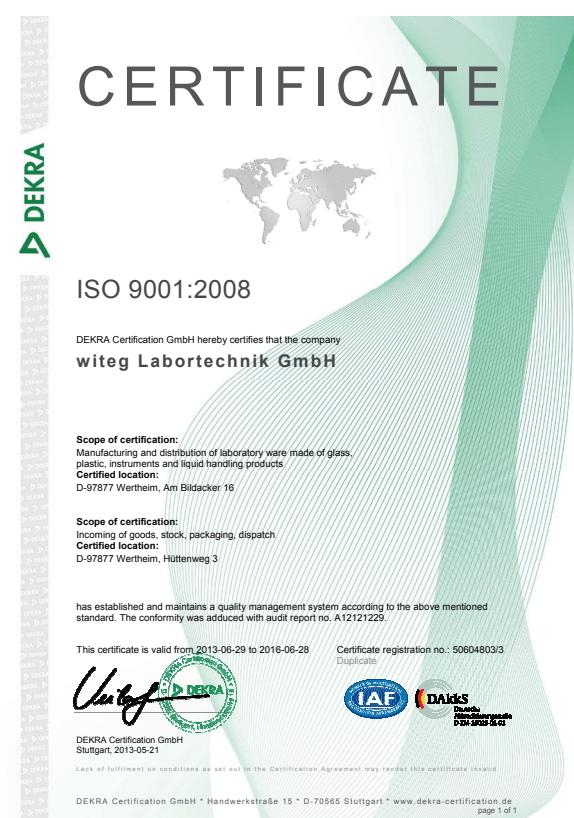

Witeg Labortechnik GmbH is one of the **leading manufacturers** and suppliers of **laboratory glassware**, **custom-built glassware**, **liquid handling articles**, **electronic instruments** and **equipment**.

Witeg Labortechnik GmbH was founded in the year 1960 to develop glass devices. Nowadays we can offer beside glass articles almost everything for the laboratories. The products fulfil the very high demands in the chemical, pharmaceutical and medical sectors and are delivered to **more than 100 countries worldwide**. Our actual product range covers **more than 30.000 products** which are **mostly ex stock** available.

Our company's philosophy is preliminary **Quality for the customer**. The **quality management system** of witeg Labortechnik has been officially **certified** already in 1994 by the **DIN EN ISO 9001** to guarantee the highest international quality standards. We permanently perform investment in qualified and engaged employees to reach the optimum level of quality. Furthermore, we emphasize to make use of latest computer-aided equipment and technique which is necessary to obtain best performance and utmost quality.

LABmax premium **NEW**

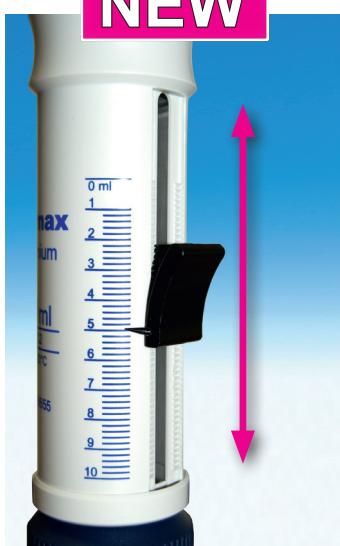

Premium Design - Premium Performance - Premium Quality

The universal dispenser **LABMAX premium** has a sophisticated system which allows air purging and draining without any loss of reagent! Due to the direct displacement system **LABMAX premium** is ideal for crystalline solutions. We improved the adjust knob for a quick and precise volume setting. In addition, we added the built-in recalibration mechanism.

Bottle-Top Dispenser

NEW

Quick and precise volume setting

Adjusting the volume of **LABMAX premium** is now even simpler: just push the re-designed quick-adjust knob – slide to the desired volume-release – that's all!

NEW

Perfect air-purging mechanism for 0% reagent loss

Turn the discharge tube at 90°. Remove (purge) trapped air without reagent loss by pumping in a closed circuit: the reagent flows back into the bottle! After pumping 2 or 3 times the dispenser is free of air and ready to use. This special feature not only helps to save residual reagent but also when accidentally setting the wrong volume!

Easy and fatigue-proof dispensing

Turn the discharge tube into the dosing mode and enjoy dispensing with **LABMAX premium**. The piston of **LABMAX premium** completely discharges the reagent with each stroke. The dispensing glass cylinder is protected with a transparent plastic coating which allows the user to view the liquid in the glass cylinder. The protective coating also reduces the risk of breakage!

100% drip-free system for your safety

By turning the discharge tube at 180° all liquid flows back into the bottle. **LABMAX premium** is completely closed and no accidental discharge can occur by inadvertently moving the piston. There is absolutely no dripping possible!

NEW

360°-turn for your added safety

No matter how much you tighten **LABMAX premium**, you can always redirect the discharge tube by simply turning the valve block to the desired position. This way the label of the bottle is always visible. This feature works for all our adapters. Adapters for different bottle threads can remain on the bottle.

"Do-it-yourself" recalibration for a long life time

If you use **LABMAX premium** as a measuring device in conformity to ISO 9001 and GLP, you may also want to control and monitor its accuracy and reliability. The piston can easily be recalibrated by turning an internal screw!

LABmax premium

Bottle-Top Dispenser

NEW

Your advantages at a glance:

- high-quality precision instrument, made in Germany
- best in its class performance, most competitive pricing
- all-purpose dispenser, universal chemical compatibility
- direct displacement piston system, ideal for crystalline solutions
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- built-in recalibration mechanism **NEW**
- robust and stable, made of high quality materials e.g. platinum springs
- 0% loss of reagent by pumping in a closed circuit **NEW**
- 100% drip-free due to our unique anti-drip system
- 360 degree rotatable valve block for added safety **NEW**
- one handed operation
- flexible by using different bottle adapters
- easy to clean, completely autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

LABmax premium

Volume	Division	Accuracy	Coefficient of variation	Thread	Order number
ml	ml	± ml	≤ ml	GL	
0.25 - 2.5	0.05	0.012	0.002	32	5 370 901
0.5 - 5.0	0.10	0.03	0.005	32	5 370 902

10.0 - 100.0	2.00	0.6	0.1	45	5 370 906

Scope of supply

Labmax premium, suction tube, discharge tube, instruction manual, individual certificate, serial number, thread adapter (2.5/5.0/10.0ml: A25, A28, A45, S40 | 25.0/50.0/100.0ml: A25, A28, A32/45, S40)

Parts in contact with reagent:

The components having direct contact with the reagent are made of chemical resistant materials:
platinum spring, ceramic valve balls, PTFE piston, borosilicate glass 3.3 cylinder

Bottle-Top Dispenser **LABmax airless HF**

The specialist for hydrofluoric acid with automatic air-purging*

LABMAX airless HF is a special dispenser for hydrofluoric acid (HF). The components which have direct contact with the acid are made of HF-resistant materials. **LABMAX airless HF** is equipped with an automatic air-purging* system: your dispenser is ready to use after no more than two dosings.

Your advantages at a glance:

- high quality precision instrument, made in Germany
- special dispenser, ideal for hydrofluoric acid
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- robust and stable, made of high quality materials e.g. platinum spring, ruby valve balls, PTFE
- 100% drip-free due to our unique anti-drip system
- 360 degree rotatable valve block for added safety **NEW**
- one handed operation
- flexible by using different bottle adapters
- easy to clean, completely autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

Parts in contact with reagent:

The components having direct contact with the reagent are made of chemical resistant materials:
platinum spring, ruby valve balls, PTFE cylinder, PTFE piston

* more details about automatic air-purging on page 8

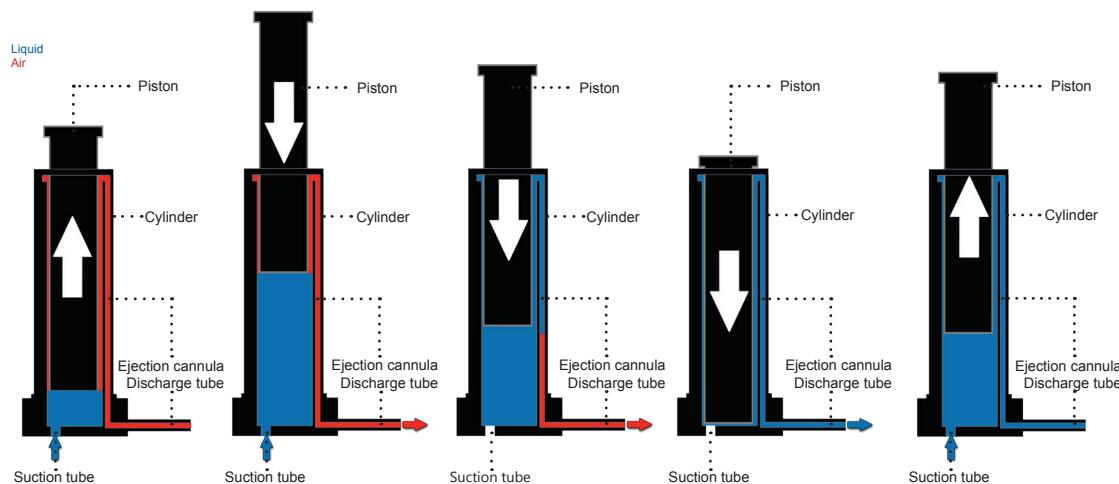

LABmax airless

The specialist for solvents with automatic air-purging

The universal-dispenser **LABMAX airless** is equipped with an automatic air-purging system: your dispenser is ready to use after no more than two dosings. The contactless piston system allows smooth and easy dispensing and makes this dispenser ideal for solvents.

Automatic air-purging

To ensure accurate volume it is necessary that the device is free from air before dispensing. All **LABMAX airless** models have an automatic air purging system. Air, lighter than liquid, passes off the device automatically through the special ejection channel and discharge tube. A contamination of the bottle content is not possible.

NEW

360°-turn for your added safety

No matter how much you tighten **LABMAX airless**, you can always redirect the discharge tube by simply turning the valve block to the desired position. This way the label of the bottle is always visible.

This feature works for all our adapters. Adapters for different bottle threads can stay on the bottle!

100% drip-free system for your safety

By turning the discharge tube at 180° all liquid flows back into the bottle. **LABMAX airless** is completely closed and no accidental discharge can occur by inadvertently moving the piston.

There is absolutely no dripping possible!

Scope of supply

Labmax airless, suction tube, discharge tube, instruction manual, individual certificate, serial number, thread adapter (2.5/5.0/10.0ml: A25, A28, A45, S40 | 25.0/50.0/100.0ml: A25, A28, A32/45, S40)

Parts in contact with reagent:

The components having direct contact with the reagent are made of chemical resistant materials:
platinum spring, ceramic valve balls, PTFE cylinder, borosilicate glass 3.3 piston

LABmax eco

The economical and ecological way to dispense

Dispensing with **LABMAX eco** is both economic and ecological friendly. This standard-dispenser is usable for nearly all applications of dispensing liquids in the lab and is especially ECOnomically priced. Use the “recycling mode” for an ECOlogical air-purging and draining without any loss of reagent!

Quick and precise volume setting

Adjusting the volume of **LABMAX eco** is very simple: just push the quick-adjust knob – slide to the desired volume – release – that's all!

Perfect air-purging mechanism for 0% reagent loss

Turn the discharge tube at 90°. Remove (purge) trapped air without reagent loss by pumping in a closed circuit: the reagent flows back into the bottle! After pumping 2 or 3 times the dispenser is free of air and ready to use. This special feature not only helps to save residual reagent but also when accidentally setting the wrong volume!

NEW

NEW

360°-turn for your added safety

No matter how much you tighten **LABMAX eco**, you can always redirect the discharge tube by simply turning the valve block to the desired position. This way the label of the bottle is always visible. This feature works for all our adapters. Adapters for different bottle threads can remain on the bottle.

100% drip-free system for your safety

By turning the discharge tube at 180° all liquid flows back into the bottle. **LABMAX eco** is completely closed and no accidental discharge can occur by inadvertently moving the piston. There is absolutely no dripping possible!

Parts in contact with reagent:

The components having direct contact with the reagent are made of chemical resistant materials:
platinum spring, ceramic valve balls, PTFE piston, borosilicate glass 3.3 cylinder

MINISPENSOR

The economical and ecological alternative to microliter pipettes

The **MINISPENSOR** is ideal for long pipetting series where you need a fixed micro-volume. In contrast to fixed volume microliter pipettes, there are no pipette tips required. There are four color-coded models available, with two definite volumes in a range of 50 µl to 2 000 µl. You can simply change the dispensing volume to 50% by turning the push button.

Every **MINISPENSOR** is able to dispense two definite volumes.
They are easy to set: Just push and turn the button at 180°.

Dispensing system

The direct displacement system of the **MINISPENSOR** is for universal use and ideal for crystalline solutions.

One handed dispensing

The **MINISPENSOR** can easily be used with just one hand.

Bottle-Top Dispenser

Your advantages at a glance:

- high quality precision instrument, made in Germany
- alternative to microliter pipettes - no tips required!
- suitable for most liquids, ideal for crystalline solutions
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- direct displacement piston system
- comfortable handling for larger pipetting series
- four color-coded models available
- easy volume setting, two definite volumes each dispenser
- 100% drip-free by turning the discharge tube by 180°
- easy to clean, autoclavable at 121°C
- suitable for safe storage in a fridge
- automatic refilling, one handed operation
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

MINISPENSOR

Volume	Accuracy	Coefficient of variation	Color	Order number
µl	± µl	≤ µl		
50 + 100	1.5	0.3	yellow	5 371 101
250 + 500	5	1	red	5 371 525
500 + 1000	6	2	blue	5 371 950
1000 + 2000	12	4	green	5 371 990

Scope of supply

Minispensor, 100ml bottle, instruction manual, individual certificate, serial number, thread adapter (GL28/GL32)

Parts in contact with reagent:

The components having direct contact with the reagent are made of chemical resistant materials:
ceramic valve balls, PTFE piston, borosilicate glass 3.3 cylinder

One instrument for all your titration and dosing applications

The digital burette TITREX is ideal for a fast and sensitive titration "drop by drop". One instrument simulates all volumes up to 99.99 ml. Moreover, titration is possible without any loss of reagent! From air-purging, necessary for a precise titration, to disassembly of the burette in the end of the titration – the reagent, that is not needed for the titration flows back into the bottle! TITREX's accuracy and precision are of highest quality. Our error ranges are better than those required by ISO 8655. The memory function allows saving of up to 1000 values, which can be transferred to a PC and read using the included software.

Bottle-Top Digital Burette

Quick and precise volume setting

The dispensing and titration volume can be set by turning the handwheels.

The mode can be changed by pressing „DOS“ respectively „TIT“.

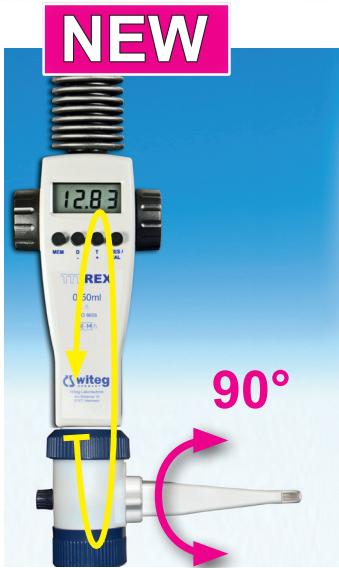

The display shows the emitted volume („TIT“ mode) respectively the filled volume („DOS“ mode).

Perfect air-purging mechanism for 0% reagent loss

Turn the discharge tube at 90°. Remove (purge) trapped air without reagent loss by pumping in a closed circuit.

The reagent flows back into the bottle! After pumping 2 or 3 times the dispenser is free of air and ready to use.

This special feature not only helps to save residual reagent but also when accidentally setting the wrong volume!

360°-turn for your added safety

No matter how much you tighten TITREX, you can always redirect the dispensing tube by simply turning the valve block to the desired position. This way the label of the bottle is always visible.

This feature works for all our adapters. Adapters for different bottle threads can remain on the bottle.

100% drip-free system for your safety

By turning the dispensing tube at 180° all liquid flows back into the bottle.

TITREX is completely closed and no accidental discharge can occur by inadvertently moving the piston.

There is absolutely no dripping possible!

“Do-it-yourself” recalibration for a long life time

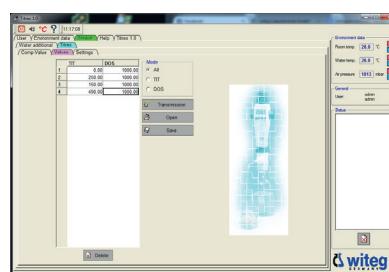

If you use TITREX as a measuring device in conformity to ISO 9001 and GLP, you need to control and monitor its accuracy and reliability.

Therefore you can easily recalibrate the value by pressing „CAL“ until the display shows „CAL“. With the buttons „+“ and „-“ you can now adjust and correct the value.

TITREX can also be adjusted to liquids with other density and viscosity.

TITREXSOFT

Included in scope of supply

Store up to 1000 values by pressing the „MEM“ button. These stored values can be read with the provided software TITREXSOFT.

Dispensed and titrated values can be shown together or separated. Read values can be saved in a file and afterwards imported into any spreadsheet program.

Your advantages at a glance:

- high quality precision instrument, made in Germany
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- resistant against most acids and alkalis
- exclusive instrument with 0% loss of reagent - air-purging and draining within a closed circuit **NEW**
- 360° rotatable valve block for your added safety **NEW**
- two-in- one instrument: dosing & titration
- covers the complete volume range up to 50 ml when used as a dispenser and up to 99,99 ml when used as a burette
- easy and precise volume setting
- vertical valves: no sedimentation, no contamination
- 100% drip-free by turning the cannula at 180°
- data storage: up to 1000 values - transfer to PC possible due to RS232 interface
- calibration: standard with water of 20°C
software enables saving the next calibration date
recalibration for liquids of different viscosities possible e.g. determination of acid content in milk
- easy to dismantle and to clean, valve block autoclavable at 121°C
- automatic power-cut-off after three minutes
- individual certificate, CE label and serial number
- DE-M marked according to the German calibration law, valid from January 2015

Premium Design - Premium Performance - Premium Quality

Looking for the latest pipetting innovation at an attractive price? **WITOPET premium** is just the right pipette for you. The ergonomic designed pipette of optimal weightiness requires extremely low pipetting forces making even prolonged pipetting as comfortable as possible. Other innovative features are the adjustable tip ejector button and the built-in volume locking. Moreover, **WITOPET premium** is characterized by superior accuracy and precision. Our error ranges are better than those required by ISO 8655.

Push-button

The push-button is color coded.

Volume locking

Once set, the desired volume is locked and cannot be accidentally changed. This useful feature allows accuracy and precision until the end of a pipetting phase.

Finger rest

In addition to the light weight, the larger finger rest reduces tension and makes prolonged serial pipetting comfortable. Your thumb is closer to the push-button, thus reducing pipetting forces.

Tip ejector button

The tip ejector button is adjustable. It doesn't matter if you are right or left-handed, this innovative feature allows effort-saving, comfortable ejection of the used pipette tips.

Body

The body of the innovative pipette is made of polypropylene, thus giving the pipette light weightiness while the robustness still remains. In addition, the smooth, rounded body fits perfect in your hand: there is no sticking to or sliding off of the handle. The result is an extremely light pipette which fits naturally in your hand!

Piston

Enjoy pipetting with **WITOPET premium**! The new piston allows extremely low pipetting forces. The result is smooth and fatigue-free pipetting and minimized risk of repetitive stress disorder.

Tip ejector

The tip ejector fits securely into the body of **WITOPET premium** and helps avoid slipping over time. The new pipette has a stainless steel tip ejector.

Tip cone

The tip cone is suitable for all established brands of pipette tips.

Single-Channel Microliter Pipette

Your advantages at a glance:

- highest quality, made in France
- best in its class performance, most competitive price
- extremely light weightiness, while the robustness still remains
- perfect ergonomics for highest comfort
- extremely low pipetting forces required for minimized risk of a cramp
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- built-in volume locking for error-free results
- innovative tip ejector button, adjustable for right- and left-handed users
- secure tip ejection, made of stainless steel
- built-in recalibration mechanism
- completely autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

WITOPET professional

The professional way for your pipetting applications

WITOPET professional single channel is the classical microliter pipette, made for the daily use in the laboratory: accurate, robust and handy. The seven models available cover a volume range from 0,2 µl to 5 ml.

Push– button

The push button is color-coded to avoid confusion and softly gliding for comfortable pipetting.

Adjustment screw

The color coded adjustment screw ensures easy and accurate volume setting.

Piston

The optimized piston allows fine adjustment of the pipetting forces, thus making the **WITOPET professional** perfect for precise laboratory applications like e.g. gel loading.

Tip cone

The tip cone is suitable for all established brands of pipette tips.

Color-Code

The push button, the adjustment thread and the tip ejector button are color coded and help to distinguish all pipettes at a single glance.

Tip ejector

The tip ejector fits well into the body of the pipette to avoid slipping over time. It is made of stainless steel for a long lifetime.

Single-Channel Microliter Pipette

Your advantages at a glance:

- high quality pipette, made in Germany
- economical priced
- perfect for precise laboratory applications
- 7 color-coded single channel models
- high accuracy and precision according to DIN EN ISO 8655
- ergonomic designed and low weighted
- optimized spring force for comfortable pipetting
- robust and stable construction
- tip ejector and piston made of stainless steel
- suitable for all established brands of pipette tips
- completely autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

WITOPET economy

The most economical way for entry-level pipetting

Looking for the most economical way to start with pipetting applications? **WITOPET economy** is a single channel pipette ideal for beginners: robust, easy to handle and easy to clean. Moreover, it is almost impossible to change accidentally the set volume once adjusted.

Piston

We used efficient components for high accuracy and precision in accordance with ISO standards.

Finger rest & pipette holder

The large finger rest supports your whole hand during pipetting. It has also the function of a pipette holder in combination with the original support – for a safe and tidy workplace.

Tip shaft

The tip shaft is autoclavable at 121°C.

Tip cone

The tip cone is suitable for all established brands of pipette tips.

Pipetting button

The pipetting button guarantees perfect dosing results until the end of a pipetting phase, even for beginners. The push button with integrated adjustment screw makes changing the volume accidentally during pipetting almost impossible.

Tip ejector

The tip ejector releases the used tip easily.

Volume display

The 3-digit display is easy to read and suitable for volumes from 0,1 µl to 5 ml.

Single-Channel Microliter Pipette

Your advantages at a glance:

- ideal for entry-level
- quality pipette, most economical price in its class
- simple and robust construction
- accuracy and precision according to DIN EN ISO 8655
- set volume almost impossible to change during pipetting
- suitable for all established brands of pipette tips
- easy release of the used tips
- easy cleaning and maintenance
- tip shaft autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

WITOPET premium

NEW

Premium Design - Premium Performance - Premium Quality

Looking for the latest pipetting innovation at an attractive price? **WITOPET premium** is just the right pipette for you. The ergonomic designed pipette of optimal weightiness requires extremely low pipetting forces making even prolonged pipetting as comfortable as possible. Other innovative features are the adjustable tip ejector button and the built-in volume locking. Moreover, **WITOPET premium** is characterized by superior accuracy and precision. Our error ranges are better than those required by ISO 8655. **WITOPET premium** is available as multi-channel model with 8 and 12 channels, covering the volume range from 0.5 to 300µl.

Volume locking

Once set, the desired volume is locked and cannot be accidentally changed. This useful feature allows accuracy and precision until the end of a pipetting phase.

Tip ejector button

The tip ejector button is adjustable. It doesn't matter if you are right or left-handed, this innovative feature allows effort-saving, comfortable ejection of the used pipette tips.

Body

The body of **WITOPET premium** is made of polypropylene, thus giving the pipette light weightiness while the robustness still remains. In addition, the smooth, rounded body fits perfect in your hand: there is no sticking to or sliding off of the handle. The result is an extremely light pipette which fits naturally in your hand!

Pipetting unit

Enjoy pipetting with **WITOPET premium**! The new unit allows extremely low pipetting forces. The result is smooth and fatigue-free pipetting and minimized risk of repetitive stress disorder.

Tip ejector

The tip ejector fits securely into the body of the pipette. In order to clean the device, the tip ejector can be removed easily by pressing the lock button.

Tip cones

The tip cones are suitable for all established brands of pipette tips.

Multi-Channel Microliter Pipette

Your advantages at a glance:

- highest quality, made in France
- the best in its class performance, most competitive pricing
- extremely light weightiness, while the robustness still remains
- perfect ergonomic pipetting for highest comfort
- extremely low forces required for minimized risk of a cramp
- highest accuracy and precision, our error ranges are better than the DIN EN ISO 8655 requirements
- built-in volume locking for error-free results
- innovative tip ejector button, adjustable for right- and left-handed users
- secure tip ejection
- built-in recalibration mechanism
- completely autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

Pipette support for Witopet premium pipettes

5 406 107 P

WITOPET economy

The convenient way for your pipetting applications

WITOPET economy is the classical microliter pipette perfectly designed for rapid and comfortable pipetting in 96 well plates.

Dosing button

The dosing button guarantees perfect dosing results until the end of a pipetting phase, even for beginners. The push button with integrated adjustment screw makes changing the volume by mistake during pipetting almost impossible.

Finger rest & pipette holder

The large finger rest supports your whole hand during pipetting. It has also the function of a pipette holder in combination with the original support – for a safe and tidy workplace.

Tip ejector

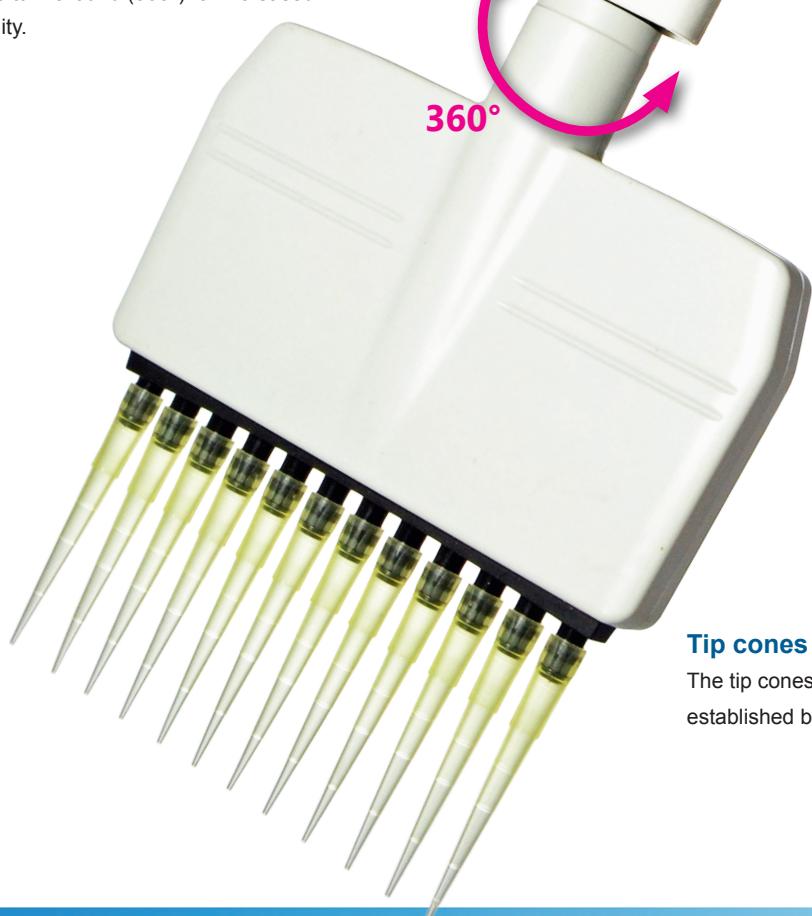

The tip ejector releases the used tip easily.

Volumeter display

The 3-digit display is easy to read and suitable for volumes from 0,5 - 300 µl.

Pipetting unit

We used efficient components for high accuracy and precision in accordance with ISO standards. The pipetting unit can be turn around (360°) for increased flexibility.

Reliable technique

The integrated mechanism is working properly every time **WITOPET economy** is used.

Tip cones

The tip cones are suitable for all established brands of pipette tips.

Multi-Channel Microliter Pipette

Your advantages at a glance:

- perfect designed for 96 well plates
- quality pipette at a very competitive price
- available with 8 or 12 channels
- accuracy and precision according to DIN EN ISO 8655
- set volume almost impossible to change during pipetting
- 360° rotatable pipetting unit for more flexibility
- suitable for most brands of pipette tips
- easy release of the used tips
- easy cleaning and maintenance
- pipetting unit autoclavable at 121°C
- individual certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

WITOPETTE plus

One instrument for serial dosing from 1 to 5000 µl

WITOPETTE plus is the ideal instrument for serial dosing: ergonomic designed, low weighted (only 100 g) but still robust and highly resistant due to the used high-quality materials. With purely mechanical, maintenance-free construction, WITOPETTE plus is the stepper pipette you can always count on!

Viewing window

This window displays the dispensing volume according to the position of the adjusting wheel (from 1 to 10) and size of the dispensing tip (from 0,05 to 50 ml).

Push button

The ergonomical designed push button is large, smooth and rounded to provide best comfort for your thumb.

Adjusting wheel

To set the desired volume, turn the adjusting wheel from program 1 to 10.

Filling lever

Push up the filling lever to draw up the inserted tip with liquid.

Stop lever

The stop lever ensures a firmly holding of the inserted tip: just push it down and the tip is locked.

Universal tip holder

The tip holder of WITOPETTE plus is suitable for all established brands of dispensing tips.

Stepper Pipette

Your advantages at a glance:

- ideal instrument for serial dosing in microliter range
- up to 48 pipetting steps in intervals of 1 second
- mechanical volume setting, 120 dosing volumes possible
- ergonomic design and low weighted for fatigue-proof dosing
- precise and accurate dosing of volumes from 1 to 5 000 µl
- suitable for all established brands of dispensing tips from 0.05 - 50 ml
- robust & stable construction for a long life time
- quality certificate and serial number
- DE-M marked according to the German calibration law, valid from January 2015

WITOPET EP

The most comfortable way for all pipetting applications

Looking for the most comfortable way of pipetting? The electronic microliter pipette **WITOPET EP** is the right product for you. The motorized pipetting process has at least two major advantages compared with manual pipetting: it avoids pipetting errors made by the user and it prevents the risk of a cramp after prolonged pipetting phases. **WITOPET EP** is available as single and multi channel pipette.

Digital display

The user-friendly display indicates set volume, set function, pipetting step, battery status etc.

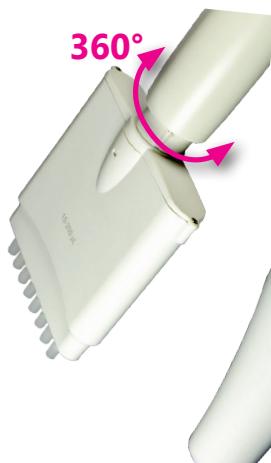

Volume and function setting

The buttons for volume and function setting are color-coded to avoid confusion.

Pipetting unit

The pipetting unit can be turned around (360°) for increased flexibility.

Tip cone

The tip cone is suitable for all established brands of pipette tips.

Body

A high precision stepping motor ensures absolute correct automatic pipetting without any mistake.

Push-button

Draw up and release of the set volume occurs with minimal effort for highest user comfort.

Tip ejector

The tip ejector releases the used tip easily.

Digital Single- and Multi-Channel Microliter Pipette

Your advantages at a glance:

- ideal for prolonged pipetting
- minimal pipetting forces required
- automatic pipetting process for highest comfort and accuracy
- multiple functions (auto-pipetting, mixing, multiple dispensing, sequential aspirating / dispensing)
- 9 memory settings
- 5 speed settings for different viscosities
- user friendly digital display
- 360° rotatable pipetting unit for more flexibility (multi-channel only)
- lithium battery for prolonged use
- serial number and CE label
- individual certificate according to DIN EN ISO 8655
- DE-M marked according to the German calibration law, valid from January 2015

WITOPED XP

The professional electric pipetting solution

WITOPED XP is a professional electric pipetting aid, suitable for all pipettes up to 100 ml. The special features like speed adjustable suction and dispensing buttons, the comfortable base which allows stable placing of the device inclusive attached pipette as well as the high-precision, long lasting motor make **WITOPED XP** an indispensable device in your laboratory.

Nosepiece release

This button protects against accidentally releasing the nosepiece.

Nosepiece

The nosepiece is suitable for all kinds of pipettes. In case of contamination, the nosepiece can be easily removed in order to exchange the filter and the silicone adapter.

Removable stand

The removable stand allows stable placing of the device along with attached pipette.

Dispenser buttons

The buttons can be individually adjusted to your application by turning:

- (F) Fast = 10 ml/s
- (M) Medium = 5 ml/s
- (S) Slow = 1 ml/s
- (G) Gravity drain

Motor

The high-precision motor is robust and made for a long life time.

Pipetting Aid

Your advantages at a glance:

- high-quality instrument, most competitive price
- high-precision, durable motor
- individual adjustment of suction and dispensing speed
- three pipetting speeds selectable:
 - (F) Fast = 10 ml/s
 - (M) Medium = 5 ml/s
 - (S) Slow = 1 ml/s
- (G) Gravity drain
- gravity drain mode for draining out without using any motor
- handy and light weighted for fatigue-proof pipetting
- tight fit of any pipette into the pipette socket
- nosepiece with replaceable filter and silicone adapter
- nosepiece autoclavable at 121°C
- removable stand for stable holding of instrument along with attached pipette
- including rechargeable battery and wall bracket
- CE label

WITOPED XP Professional

Type	Order number
220 V	5 380 001
120 V	5 380 002

Scope of supply

WITOPED XP, battery charger, replacement filters, removable stand, instruction manual

Replacement one-way filter

Packaging unit	Order number
5	5 380 006

Replacement silicone adapter

	Order number
	5 380 004

WITOPED eco

The economic electric pipetting solution

WITOPED eco is an economically priced electrical pipette aid, suitable for all pipettes up to 100 ml.

Nosepiece

The nosepiece is suitable for all kinds of pipettes. In case of contamination, the nosepiece can be easily removed in order to exchange the filter and the silicone adapter.

Dispenser buttons

The WITOPED eco has two buttons, one for aspirating the liquid (up), one for releasing the liquid (down).

Digital display and speed setting

The LCD display indicates battery status and set speed. The pipetting speed can be adjusted by pushing the "+/-" buttons.

Motor

The powerful motor ensures fast and reliable pipetting.

Pipetting Aid

Your advantages at a glance:

- suitable for all pipettes up to 100 ml
- most affordable price in its class
- digital display indicating battery status and selected speed
- efficient battery for a long runtime, low battery alert
- fine adjustment of pipetting speed
- tight fit of any pipette into the pipette socket
- handy and light weighted for fatigue-free pipetting
- simple but powerful motor for fast and reliable pipetting
- gravity drain mode for draining out without using any motor
- nosepiece with replaceable filter and silicone adapter
- silicone adapter autoclavable at 121°C
- CE label

WITOPED eco

Type	Order number
220 V	5 381 000

Replacement silicone adapter

	Order number
	5 382 010

WITO pipette controller

The simplest pipetting solution

WITO pipette controller is the classical pipetting aid, suitable for all pipettes up to 100 ml.

Suction bellow

The pipette is easily filled by squeezing the suction bellow.

Controller

The pipetting mechanism is mechanical and therefore maintenance-free.

Nosepiece

The nosepiece is suitable for all pipettes up to 100ml. In case of contamination, the nosepiece can be easily removed in order to exchange the filter and the silicone adapter.

Pipetting lever

With the spring-loaded lever the selection between suction (up) and dispensing (down) can be easily made.

Technique inside

WITO pipette controller delivers reliable results.

Pipetting Aid

Your advantages at a glance:

- good quality for an affordable price
- simple, maintenance-free device
- robust and light weighted
- made for a long life time
- easy selection between suction and dispensing
- available in 5 colors
- silicone adapter autoclavable at 121°C

WITO pipette controller with integrated one way filter

Color	Order number

WITO pipetting tools

Pipette filler with 3 valves

made of natural rubber, standard model for pipettes up to 100 ml, resistant to age and chemicals

Order number

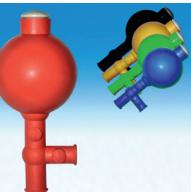

Standard up to 10ml	3 965 000
Universal with elongated cone up to 100ml	3 966 000

3 966 000

Pipette filler with 2 valves

easy to use, two pressure valves for suction and release of the liquid, one automatic air purge valve, effective cleaning by removing the automatic valve, in 5 different colors available

Color	Order number
red	3 967 000
black	3 967 001
yellow	3 967 002
blue	3 967 003
green	3 967 004

Suction bulb

made of PVC, for pipettes with diameter of 6 mm

Size	Suction volume	Ball diameter	Order number
B oval	5 ml	25 mm	3 597 001
0	8 ml	30 mm	3 597 002
2	25 ml	42 mm	3 597 003
3	40 ml	48 mm	3 597 004
5	89 ml	62 mm	3 597 005

9	224 ml	84 mm	3 597 007
11	347 ml	94 mm	3 597 008

Suction bulbs for pipettes in 6 different colors available

For capacity	Color	Pack size	Order number
approx. 2 ml	transparent	10 pcs.	3 968 000
1 ml	green	10 pcs.	3 968 001
2 ml	grey	10 pcs.	3 968 002
5 ml	yellow	10 pcs.	3 968 005
10 ml	blue	10 pcs.	3 968 010
15 ml	red	10 pcs.	3 968 015

Safety pipette filler Howorka ball

ultrasafe laboratory aid for universal use, specially designed opening for immediate sealing of all standard pipette diameters, suitable also for organic solvents and viscous liquids, easy to clean, autoclavable

For capacity	Order number
20 ml	3 595 020
50 ml	3 595 050

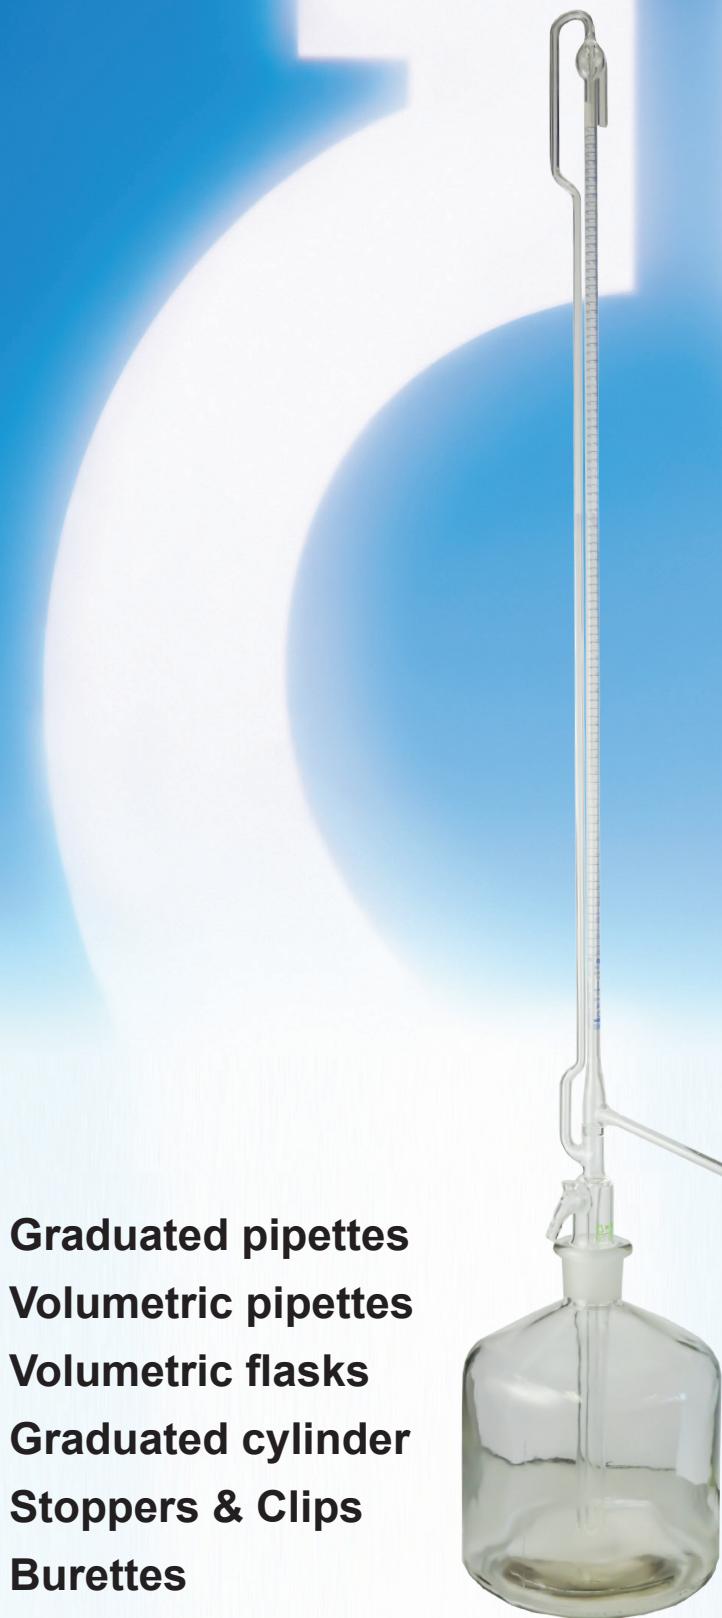

Pipette pump with fast release „pi-pump“

made of PP, suitable for pipettes up to 25 ml, suction and dispensing achieved by rotating the thumbwheel. With exception of the 0,2 ml pi-pump, an additional lever releases vacuum to let liquid flow quickly.

For capacity	Color-code	Order number
0,2 ml	yellow	7 032 001
2 ml	blue	7 032 002
10 ml	green	7 032 003
25 ml	red	7 032 004
Stand for „pi-pump“		7 032 111

Glassware devices

...made by  witeg
GERMANY

Highest accuracy and precision

Permanent monitoring of the manufacturing process guarantees the production of high quality glassware devices. The accuracy and precision of class A/AS devices are according to the high requirements of ISO standard. Our devices of class B are characterized by accuracy and precision exceeding generally the requirements of ISO standards. With regard to our class B devices, the error ranges are even better than those required by ISO standard for class B.

Wide product range

Standard labware consumables

We have more than 30.000 articles available ex stock, including volumetric devices like pipettes, cylinders, burettes, flasks, beakers etc.

Custom-built products

We can produce glassware devices of special sizes (marked with * in this catalogue). We are flexible in producing special and small-lot production, so please feel free to contact us!

Comprehensive service

Glassware repairs

Looking for an expert in repairing glassware? Our glassblowing department would be glad to save your glass device and not least – the environment.

Plastic coating

Do you want to protect your glassware against shatter? We can coat glassware on request.

Amber staining

Looking for glassware with highest chemical resistance and light protection? Amber staining is the right procedure for your glassware.

Our service has nearly no limit. If you have any questions, please do not hesitate to contact us:

USP

- made of borosilicate glass 3.3
- tall form (standard)
- standard with spout
- graduation: DIFFICO brown (standard)
- tolerance according to ASTM E 1272
- produced according to DIN EN ISO 4788
- DE-M marked according to the German calibration law, valid from January 2015
- inclusive batch certificate
